

## European Technical Assessment

**ETA 12/0257**  
of 14/12/2017

### General Part

**Technical Assessment Body issuing the European Technical Assessment:**

RISE Research Institutes of Sweden AB

**Trade name of the construction product**

Golden Anchor

**Product family to which the construction product belongs**

Torque-controlled expansion anchor of sizes M8, M10, M12 and M16 for use in non-cracked concrete

**Manufacturer**

Essve Produkter AB  
Esbogatan 14  
SE-164 74 Kista, Sweden  
[www.essve.se](http://www.essve.se)

**Manufacturing plant(s)**

Essve Produkter AB plant no 369

**This European Technical Assessment contains**

8 pages including 5 Annexes which form an integral part of this assessment.

**This European Technical Assessment is issued in accordance with regulation (EU) No 305/2011, on the basis of**

EAD 330232-00-0601 Mechanical fasteners for use in concrete

**This version is a second corrigendum to**

ETA 12/0257-2017-12-04

Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and should be identified as such.

Communication of this European Technical Assessment, including transmission by electronic means, shall be in full. However, partial reproduction may be made with the written consent of the issuing Technical Assessment Body. Any partial reproduction has to be identified as such.

Specific parts

## 1 Technical description of the product

The Golden Anchor is an anchor made of electro-galvanized steel or hot dip galvanized steel with one sleeve which is placed into a drilled hole and anchored by torque-controlled expansion. It is available in sizes of M8, M10, M12 and M16.

The installation data is shown in the figure in Annex 3.

## 2 Specification of the intended use(s) in accordance with the applicable European Assessment Document (hereinafter EAD)

The anchor is intended to be used for making structural fixings into concrete.

The anchor is for use only in structures of reinforced or unreinforced, non-cracked normal-weight concrete with a strength class in the range of C20/25 to C50/60 in accordance with EN 206:2000, and in dry, internal conditions and for anchorages subject to static or quasi-static loading.

The provisions made in this European Technical Assessment are based on an assumed working life of the anchor of 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

## 3 Performance of the product and references to the methods used for its assessment

### 3.1 Essential characteristics and their performance

		Characteristic	Performance
BWR 1	Mechanical resistance and stability	Characteristic resistance	See Annex 4 and 5
		Durability	See Annex 2
BWR 2	Safety in case of fire	Reaction to fire	Class A1

## 4 Assessment and verification of constancy of performance (hereinafter AVCP) system applied, with reference to its legal base

According to the decision 96/582/EC – of the European Commission, the system of assessment and verification of constancy of performance (see Annex V to the regulation (EU) No 305/2011) to be applied is 1.

## **5 Technical details necessary for the implementation of the AVCP system, as provided for in the applicable EAD**

Technical details necessary for the implementation of the AVCP system are laid down in the control plan deposited at RISE.

Issued in Borås on 31.10.2022  
By RISE Research Institutes of Sweden AB
